

Multiple-choice test based on the Summative assessment for Unmanned Aerial Vehicles (UAVs):

1. What are the essential components of a drone?
 - a) Motors, propellers, and sensors
 - b) Cameras, batteries, and antennas
 - c) Hardware and software
 - d) All of the above

2. When did the development of unmanned aerial vehicles (UAVs) begin?
 - a) Early 20th century
 - b) 1950s
 - c) 1970s
 - d) 1990s

3. What is the Drone Revolution?
 - a) A new drone model
 - b) The increased popularity of drones
 - c) The development and advancements in drone technology
 - d) The use of drones for military purposes

4. How can UAVs help to resolve challenges?
 - a) By providing aerial surveillance and monitoring
 - b) By delivering goods and services
 - c) By assisting in search and rescue operations
 - d) All of the above

5. What are some home applications of drones as an individual?
 - a) Aerial photography and videography
 - b) Delivery of goods and services
 - c) Monitoring property and wildlife
 - d) All of the above

6. What are some commercial applications of drones as an entrepreneur?
 - a) Agriculture and forestry
 - b) Film and entertainment
 - c) Infrastructure inspection and maintenance
 - d) All of the above
7. What are some of the careers and businesses available as a licensed drone pilot?
 - a) Aerial surveying and mapping
 - b) Construction site monitoring
 - c) Search and rescue operations
 - d) All of the above
8. What are the laws and policies related to the use of UAVs in South Africa?
 - a) The Civil Aviation Regulations (CARs)
 - b) The National Aviation Policy (NAP)
 - c) The Drone Regulations (DRs)
 - d) All of the above
9. What is the purpose of developing drones?
 - a) To provide aerial surveillance
 - b) To assist in search and rescue operations
 - c) To deliver goods and services
 - d) All of the above
10. How have UAVs impacted various industries and sectors?
 - a) By improving efficiency and productivity
 - b) By reducing costs and risks
 - c) By providing new opportunities for innovation and growth
 - d) All of the above

Unmanned Aerial Vehicle (UAV) topic:

Section B – Challenges that will be solved by UAV (40)

1. Which of the following challenges can be solved by using UAVs in your community?
 - a) Traffic congestion
 - b) Monitoring illegal activities
 - c) Delivering medical supplies to remote areas
 - d) All of the above

2. What are the solutions to the challenges identified in question 1?
 - a) Improved traffic management
 - b) Enhanced surveillance and monitoring
 - c) Efficient delivery of essential supplies
 - d) All of the above

3. In what capacity do you see Autonomous Vehicles being rolled out in your community?
 - a) Consumer
 - b) Industrial
 - c) Both consumer and industrial
 - d) None of the above

4. What UAV services will be needed in y_____?

Section D – The Laws and Policy of UAV in South Africa (30)

1. What does RPL stand for? (2)
 - a. Remote Pilot License
 - b. Remote Programming Language
 - c. Remote Pilot Laws
 - d. Remote Programming License

2. Which Authority oversees the laws of the UAVS? (2)
 - a. South African Civil Aviation Authority (SACAA)
 - b. South African Police Service (SAPS)

- c. South African National Defence Force (SANDF)
- d. South African Maritime Safety Authority (SAMSA)

3. What does remotely piloted aircraft (RPAS) mean in your own words? (2)
- a. An aircraft that can be flown without a pilot onboard, using a remote-control device.
 - b. An aircraft that is piloted by a remote pilot located in a different country.
 - c. An aircraft that can be flown...

Section E :The Future of Unmanned aerial Vehicles

1. Which Batteries are currently in use for the drones?
2. Which engine will enable the drones to carry more capacity?
3. What is the future drones going to carry
 - A. Passengers
 - B. Cargo
 - C. Animals
 - D. Water
4. True or False : Drones will be smarter than AI?
5. True or False : The next development will be swarming of drones by uses of different groups will be capable of using one or more units because of the demand exclusively by army units for reconnaissance and combat operation?
6. Name 3 ways the Drones will shape the future and how?

Section F : Unnamed Aerial Vehicles – Business Plan

Draft

Prepare a business plan detailing the following:

- List the Autonomous Vehicles services that you think are needed in the community.
- Your ideal pricing structure for each of the service you plan to provide.
- Major Internet challenges you see delivering your business plan.
- Solutions to the challenges you have identified.
- List the stakeholders you think will be needed to resolve the challenges.

1.Business Plan:

2.Introduction:

3.Autonomous Vehicle Services:

4. Internet Challenges:

5.Stakeholders:

6.Conclusion:
